-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method of distributing digital photographs over the internet where the improvement comprises a step of pre-selecting a virtual border for association with the photograph when viewed online, classified in class 705, subclass 26.
- II. Claims 2-5, drawn to a method of distributing digital photographs over the internet where the improvement comprises a step of establishing a plural-level marketing hierarchy, and establishing and enforcing a fee distribution protocol for distributing service fees down through the hierarchy, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

to be separately usable. In the instant case, invention I may be practiced in any method of distributing digital photographs regardless of the fee distribution protocol that is employed. For example, photographs may be distributed in which there is no fee or in which the entire fee is distributed to a single entity. Similarly, invention II may be practiced regardless of the particular selection options (i.e. selection of a virtual border for association with the photograph) presented. The particular selection option may be made regardless of the fee distribution protocol employed. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be
